

The Kodit CAREMagic Print Solution offers a powerful application programming interface that can be used by any software vendor, developer or systems integrator to allow their applications to print GS1certified patient wristband and labels

The CareMagic Print Solution uses industry standard programming language thus enabling easy connection to any existing PAS system, normally within 5 days.

The CareMagic Print Solution is provided with a full API document and demonstration software is available

#### How Does It Work?

**Print GS1 Certified  
Wristbands from any PAS  
Within 5 days**

The Kodit CMP Print Solution will extract the relevant data fields from the PAS and create the template to be printed.

The Kodit CMP Print Solution will, where required, add linear barcode and/or GS1 2D Data Matrix barcode to the template.

The Kodit CMP Print solution will apply GS1 code to ensure the printed barcodes are GS1 Compliant.
